Harnessing the Healing Power of Art

THE ART OF HEALING

MIND • BODY • SOUL

The hospital environment can be stressful, even for the bravest. When we navigate healthcare facilities, we often anticipate pain, suffering, and a sense of dread. In many hospitals, stark walls, bare floors, and unadorned furniture leave patients, visitors, and staff without a space that offers rest, beauty or peace.

At CTP, our mission is to harness the healing power of art. In healthcare settings, there is a profound need for additional support and care, and art reaches the mind, body and soul both directly and in subtle yet powerful ways.

Exciting developments are underway; leading healthcare facilities have recognized that integrating art into their buildings significantly enhances patient recovery and overall wellness.

Hospitals have seen remarkable results, not only do patients heal faster, but the atmosphere uplifts visitors, physicians, and staff. Art creates a sense of care that is felt by everyone. In addition it makes economic sense to cultivate an environment where the art, the architecture and the interior work in harmony towards healing.

We look forward to connecting and learning more about your projects to explore how we can support your vision.

Thank you for considering this important partnership.

Benefits of art in hospital facilities include

- ✓ Increased satisfaction of patients, visitors, and staff
- ✓ Reduced stress, anxiety, depression
- ✓ Reduced pain medication usage and sedatives
- ✓ Fewer post-surgery complications
- ✓ Improved recovery
- ✓ Shorter hospital stays
- ✓ Differentiation as a forward-thinking institution
- ✓ Holistic approach to health
- ✓ Increased patient volume/turnover
- ✓ Increased donations
- ✓ Encouraging patient-staff interaction
- ✓ Artwork helps with wayfinding
- ✓ Promoting inclusivity and diversity
- ✓ Community engagement
- ✓ Improving staff productivity, focus and creativity
- ✓ Burnout prevention of staff
- ✓ Boosting retention and recruitment
